

## Thank you from HMPG and the editors

### The SAMJ reviewers

HMPG and the editors of *SAMJ* would like to thank all who participated in the peer review process during this past year. We are grateful for the expertise, insight and thoughtful critiques shared with our authors through the review process, and without which maintaining the high standard of our journal would be impossible.

We apologise if any individual reviewer has inadvertently been excluded, and to those reviewers who were recruited after this issue was published.
