

The following acknowledgements should have appeared in Part 2 of the September SAMJ:

'Selective cerebral hypothermia for post-hypoxic neuroprotection in neonates using a solid ice cap' by A R Horn *et al.* (pp. 976-981):

The authors gratefully acknowledge partial support in the form of a research grant from the Institute of Child Health, School of Child and Adolescent Health, University of Cape Town.

'Secular trends in risk behaviour of Cape Town grade 8 students' by Alan J Flisher *et al.* (pp. 982-987):

The authors would like to thank Nazeema Ahmed, Janet Evans, Shaheida Jansen, Chris Seebregts, Mike Seebregts and Martie Muller for their intellectual contributions, and the research assistants for their excellent fieldwork. They would also like to thank the principals, staff and students at the participating schools, and the Western Cape Education Department for their support of the project. The data for 2004 were drawn from the project entitled: 'Promoting sexual and reproductive health: School-based HIV/AIDS prevention in sub-Saharan Africa'. The acronym for the project is 'SATZ', which stands for South Africa Tanzania. The SATZ study is funded by the EC-INCO research programme (Fifth Framework Programme – contract number ICA4-CT-2002-10038). The partners and principal investigators include: University of Cape Town (Alan J Flisher), Muhimbili University College of Health Sciences (Sylvia Kaaya), University of the North (Hans Onya), Karolinska Institute (Minou Fuglesang), University of Maastricht (Herman Schaalma), University of Oslo (Knut-Inge Klepp), World Population Foundation & Youth Incentives (Jo Reinders), and University of Bergen (Leif Edvard Aarø – co-ordinator).
