PART 2

- 61-73 **Guideline for the management of chronic obstructive pulmonary disease – 2011 update**

5 CPD QUESTIONS

1 PROFESSIONAL ADVERTISING – FOREIGN OPPORTUNITIES

4 PROFESSIONAL ADVERTISING – LOCAL OPPORTUNITIES

The Barn Owl Tyto alba is the most widely distributed land bird in the world – 35 sub-species have been recognised. As its name suggests, it is often associated with human habitation, where it breeds in old buildings and also in mine shafts, hollow baobabs and disused Hamerkop nests. It is a rodent specialist, and piles of regurgitated pellets accumulate at roosting and nesting sites. Its eerie shrieking calls at night have given rise to many superstitious beliefs about it. The clutch is usually about 6 eggs but, in years of rodent population explosions, as many as 12 young may be raised.
