

CPD questionnaires must be completed online via www.cpdjournals.co.za
After submission you can check the answers and print your certificate.

1. True (A) or false (B):
Prostate cancer is the most common cancer in men in the UK.
2. True (A) or false (B):
Prostate cancer occurs predominantly in young men.
3. True (A) or false (B):
Many prostate cancers detected in asymptomatic patients are indolent and do not shorten life.
4. True (A) or false (B):
In all instances it is possible to accurately predict which prostatic cancers change from low-risk and slow-growing to high-risk and aggressive tumours.
5. True (A) or false (B):
The risk of overtreatment of prostate cancer is increased in older men.
6. True (A) or false (B):
Many studies suggest that prostate cancer is more common and more aggressive in blacks.
7. True (A) or false (B):
Prostate-specific antigen screening for prostate cancer is one of the most cost-effective public health measures.
8. True (A) or false (B):
In clinical trials it is more expensive to recruit a patient onto a trial than to retain a patient in the trial.
9. True (A) or false (B):
Results from a study in this issue show that 'retention gifts' to clinical trial participants function as a motivational tool.
10. True (A) or false (B):
In South Africa there is an ominous resurgence of multidrug-resistant tuberculosis (MDR-TB) and extensively drug-resistant TB (XDR-TB).
11. True (A) or false (B):
XDR-TB is associated with poor treatment outcomes.
12. True (A) or false (B):
Some hope is in sight with the impending arrival of new anti-TB drugs.
13. True (A) or false (B):
XDR-TB was first encountered in the Cape Metropole area of the Western Cape in 2010.
14. True (A) or false (B):
MDR-TB was recognised in the Western Cape in the mid-80s.
15. True (A) or false (B):
XDR-TB is almost exclusively associated with HIV-related attenuated host immunity.
16. True (A) or false (B):
Some patients who are underweight become obese on antiretroviral therapy (ART).
17. True (A) or false (B):
Obesity is a risk factor for the development of lactic acidosis, a potentially life-threatening adverse effect of ART.
18. True (A) or false (B):
Lipodystrophy is a complication of ART that presents as truncal obesity, enlarged breasts and peripheral wasting of the buttocks, limbs and face.
19. True (A) or false (B):
All lipodystrophy body changes are readily reversible.
20. True (A) or false (B):
Lipodystrophy caused by stavudine should be actively screened for to identify and manage this adverse effect.

INSTRUCTIONS

1. Read the journal. All the answers will be found there.
2. Go to www.cpdjournals.co.za to answer the questions.
