

CPD questionnaires must be completed online via www.cpdjournals.co.za
After submission you can check the answers and print your certificate.

1. True (A) or false (B):
In a study on harms associated with 20 drugs, alcohol was rated the most harmful substance overall.
2. True (A) or false (B):
Tobacco was ranked the least harmful of the 20 substances studied.
3. True (A) or false (B):
Cannabis was ranked the second most harmful substance.
4. True (A) or false (B):
Heroin prescribing and needle and syringe programmes for people who inject drugs have been shown to be an effective evidence-based intervention in managing drug addiction.
5. True (A) or false (B):
In some countries problem and pathological gambling are treated as a significant public health problem.
6. True (A) or false (B):
Gambling in South Africa was originally treated as immoral and largely prohibited, apart from horse racing.
7. True (A) or false (B):
The South African Government established a National Responsible Gambling Programme (NRGP).
8. True (A) or false (B):
The NRGP is a section 21 company chaired by someone independent of both public and private sector interests.
9. True (A) or false (B):
Gambling problems are significantly associated with other psychological disorders.
10. True (A) or false (B):
The gambling industry is perceived as being poorly and recklessly regulated.
11. True (A) or false (B):
The main problems facing the NRGP are how to ensure that more of those who would benefit from treatment actually seek it.
12. True (A) or false (B):
Prenatal alcohol exposure can result in a range of permanent birth defects known as fetal alcohol spectrum disorders.
13. True (A) or false (B):
Fetal alcohol syndrome (FAS) adversely affects the neurodevelopmental, physical and social capabilities of children.
14. True (A) or false (B):
Children with behavioural and/or developmental disorders were 3 times more likely to have mothers who currently drink.
15. True (A) or false (B):
Burns are a rare cause of non-natural death in infants and children aged under 5 years in South Africa.
16. True (A) or false (B):
More than 1 300 children die annually from burns in South Africa.
17. True (A) or false (B):
Conventional care of partial-thickness burns often requires twice-daily dressings.
18. True (A) or false (B):
Silver inactivates almost all bacteria, and many fungi and extracellular viruses.
19. True (A) or false (B):
Silver-containing topical agents have remained 100% effective in all instances.
20. True (A) or false (B):
Topical agents used in burns differ in their ability to penetrate an eschar.

INSTRUCTIONS

1. Read the journal. All the answers will be found there.
2. Go to www.cpdjournals.co.za to answer the questions.
